

BEST IN BUILDING LASTING MUSICAL BONDS

MOVE TO THE BEAT

Create lasting musical memories with your child at *Our Music Studio*.

Music is an indispensable ingredient to the growing up years of a child's life. A good music programme helps your child develop better motor skills and enhances his/her auditory and language skills by stimulating the brain. Your child's musical journey at the school begins under the guidance of experienced and engaging music educators with decades of experience in teaching preschool music with movement.

Our Music Studio employs the Music Learning Process, a systematic approach based on Orff-Schulwerk, Dalcroze and Kodaly frameworks. In this process, your child will gain exposure to a wide and enriching repertoire of music genres, ranging from world music to classical music to children's songs and rhymes.

From the Music Learning Process, your child will be guided to internalise music heard through activities that teach the fundamentals of music. After that, the class will be facilitated in the process of expressing the music

they learnt through body percussion, instrument exploration, vocalization, and ensemble playing.

You will find the dedicated studios equipped with a wide range of musical instruments for your child to explore.

Our Music Studio offers premium music with movement classes to newborn babies, toddlers, preschool and kindergarteners. Many of our parents find our classes effective in helping them impart the love and knowledge of music to their young children. Our families also enjoy the bonding and learning at home with the aid of the thematic CDs and newsletter.

Come and join us at Our Music Studio! Together we can build musical bonds that last.
